Email from Brian Swan, DMR, to Bob Green, DEP, Feb. 1, 2011 at 5 p.m;

Email from Bob Green, DEP to Marybeth Richardson, DEP, Feb. 2, 2011, at 9:35 a.m.

Green, Robert

From: Swan, Brian
Sent: Tuesday, February 01, 2011 5:00 PM
To: Green, Robert
Subject: RE: Kennebec River, Maintenance Dredging Request (UNCLASSIFIED)

Hi Bob,

There may be fish of concern in the area including salmon and sturgeon near Doubling Pt. and definitely lobstering off Popham Beach.

I'll see what others think.

Brian

Good afternoon,

The condensed version of what's written below is whether we have a problem with dredging activity at Doubling Point going on in late July and August. The Corps has already started the process for maintenance dredging at Doubling Point/Popham Beach, but now it looks like they need to fast track the project.

What are your thoughts?

Bob.

Gentlemen,

I apologize in advance for the long email but I felt that emailing once would be easier than my calling you all individually and explaining the situation.

I recommend reading my email below as it offers some background and when prompted, you should open the attached files for "the rest of the story"

I'm writing to give you all a "heads-up" and to request your advance consideration of the attached letters from Captain Krestos of the USN (SUPSHIP in Bath) to Major General Grisoli of the HQUSACE.

Here's a little background for your information. In late November 2010, Captain Krestos

Good morning,

FYI, this looks like something we'll have to rush through, possibly over Brian's objections. I'll keep you informed.

Bob.

Good morning,

I contacted Brian Swan of the Department of Marine Resources so he knows what's going on and has some concerns with migrating fish. I'm not sure if he can make next week's meeting.

Brian, if you can't make the meeting, would it be possible to send us your concerns and any mitigation efforts that may be useful to resolve your concerns?

Thanks,

Bob.

Bob:

Our office is closed today so Bill's not in. I assume that Tuesday at 9 will work for us. As you can imagine for us to dredge in August before the ship movement in September, we need things to happen pretty quickly. We appreciate your help.
