

**U.S. Fish & Wildlife Service**

**Connecticut River Coordinator's Office**

*Restoring Migratory Fish to the Connecticut River Basin*

About Us

Recreational  
Fishing

**Connecticut River  
Migratory Fish  
Counts, 1967-2007**

**Last updated April 11, 2008**

Observed fish counts do not represent all returns.

Data are reported to the nearest individual for totals 0

-999; to the nearest 100 for totals 1,000-9,999; to the nearest 1,000 for totals 10,000-99,999; and to the nearest 10,000 for totals greater than or equal to 100,000.

\*Shad River Return Estimates are not provided because physical changes made at the Holyoke fishlift in 2005 have altered the predictive model previously used to make this estimate. As a result, a reliable estimate can not be provided until further studies are undertaken to test the current efficiency of the fishway.
